

## **practical 6.c : write a js to get details of history**

**-->first page code**

```
<html>
<script>

function forward() {
  window.history.forward();
}

</script>
<body >
<h1>First Page</h1>
<a href="6_c(1).html">click here for next page</a>
<br><button onclick="forward()">Forward</button>
</body>
</html>
```

**-->second page code**

```
<html>
<script>

function Back() {
  window.history.back();
}

</script>
<body>
<h1>Second Page</h1>

<button onclick="Back()">Go Back</button>

</body>
</html>
</body>
</html>
```
